# Project Vision And Mission

## Vision

Simplify and enhance the experience of finding a roommate/flatmate

## Mission

Build a mobile application that places the choice within the user's hand through the power of machine learning algorithms

# What is BilMate

01

An Android mobile application aimed at  
Bilkent University students

02

Helps Bilkent University students find a  
stay or a roommate to live with.

03

Leverages machine learning algorithms to  
find the most compatible roommate

# Why BilMate

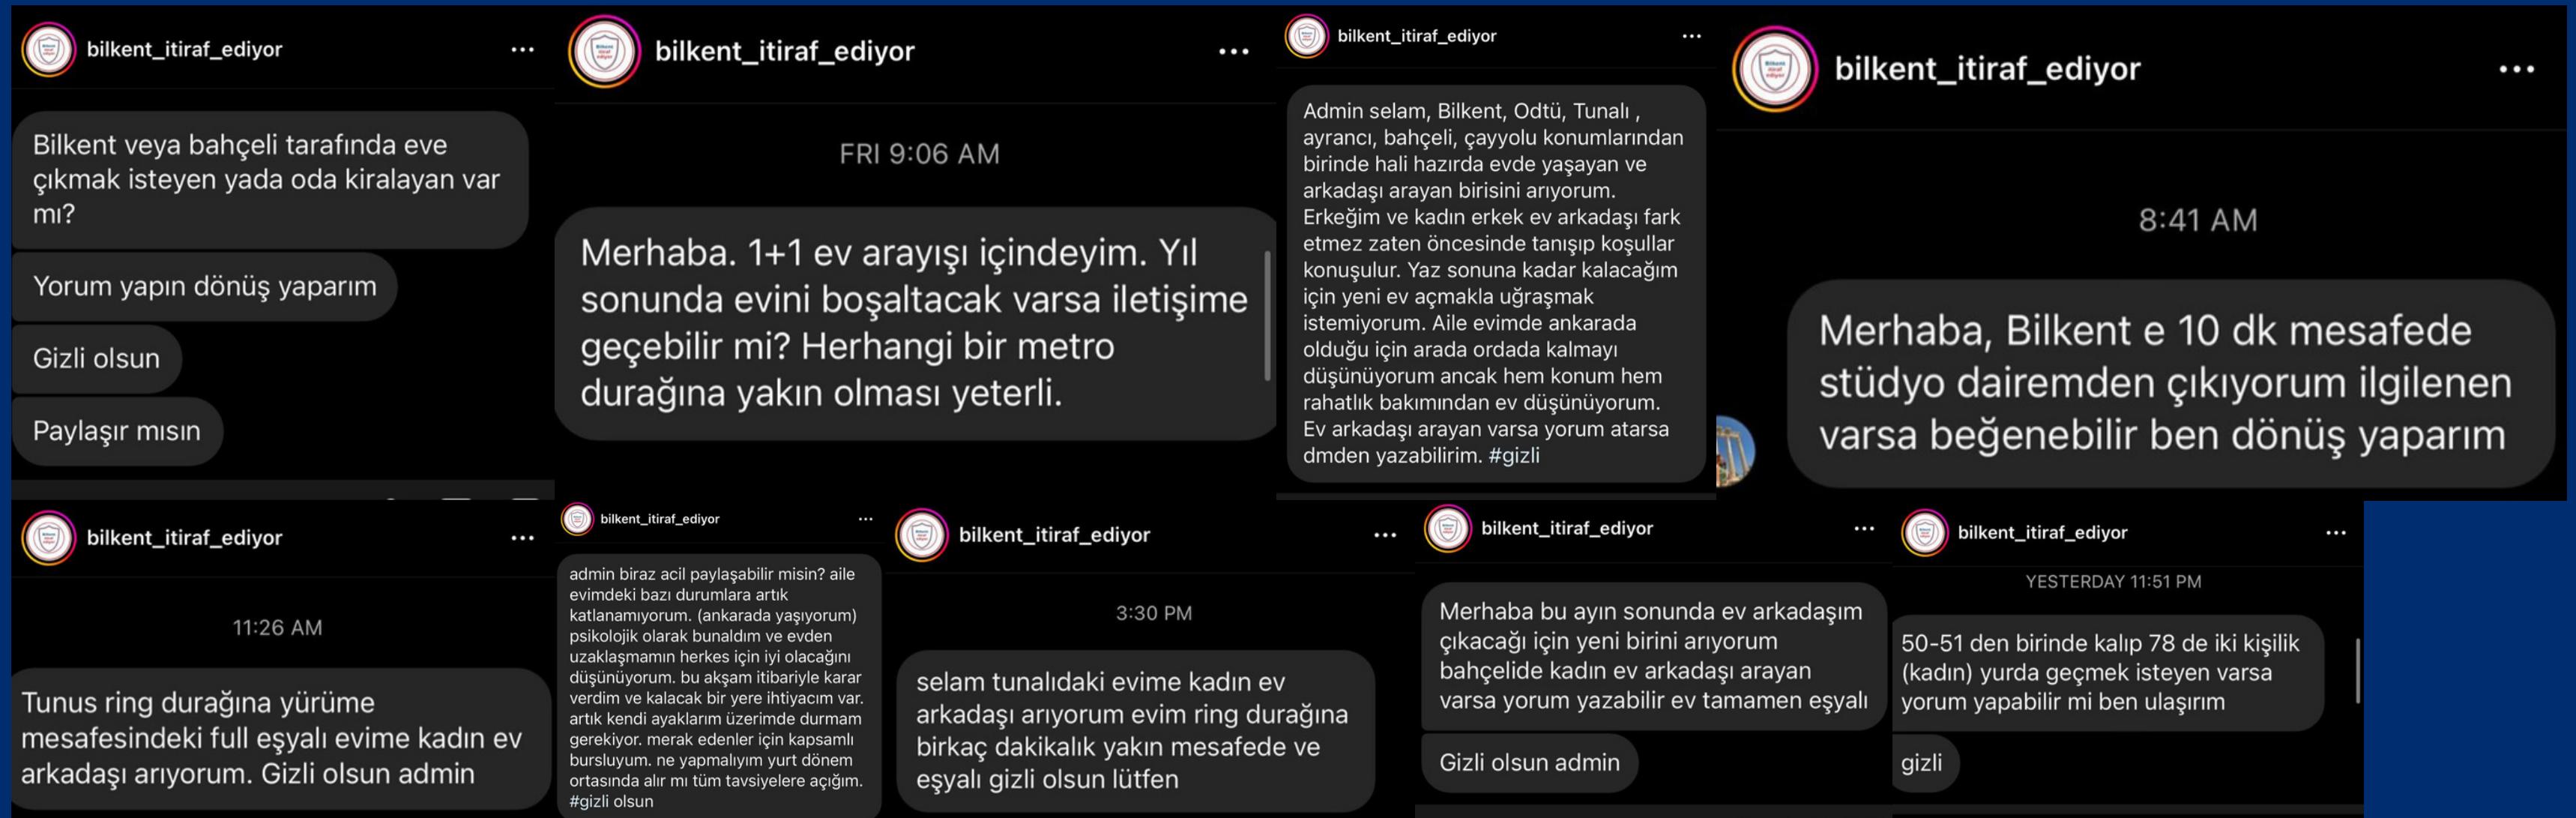

01

## Old System

- The current system in place is insufficient and outdated.
- Time-Consuming

So ... What Is the Old System?

# The Old System

... and more

# The Old System

# Why BilMate

02

## Ineffective Alternatives

- Facebook Group
- Erasmus Website
- A website with no traffic.
- Shortcoming: none are appealing to Bilkent University students

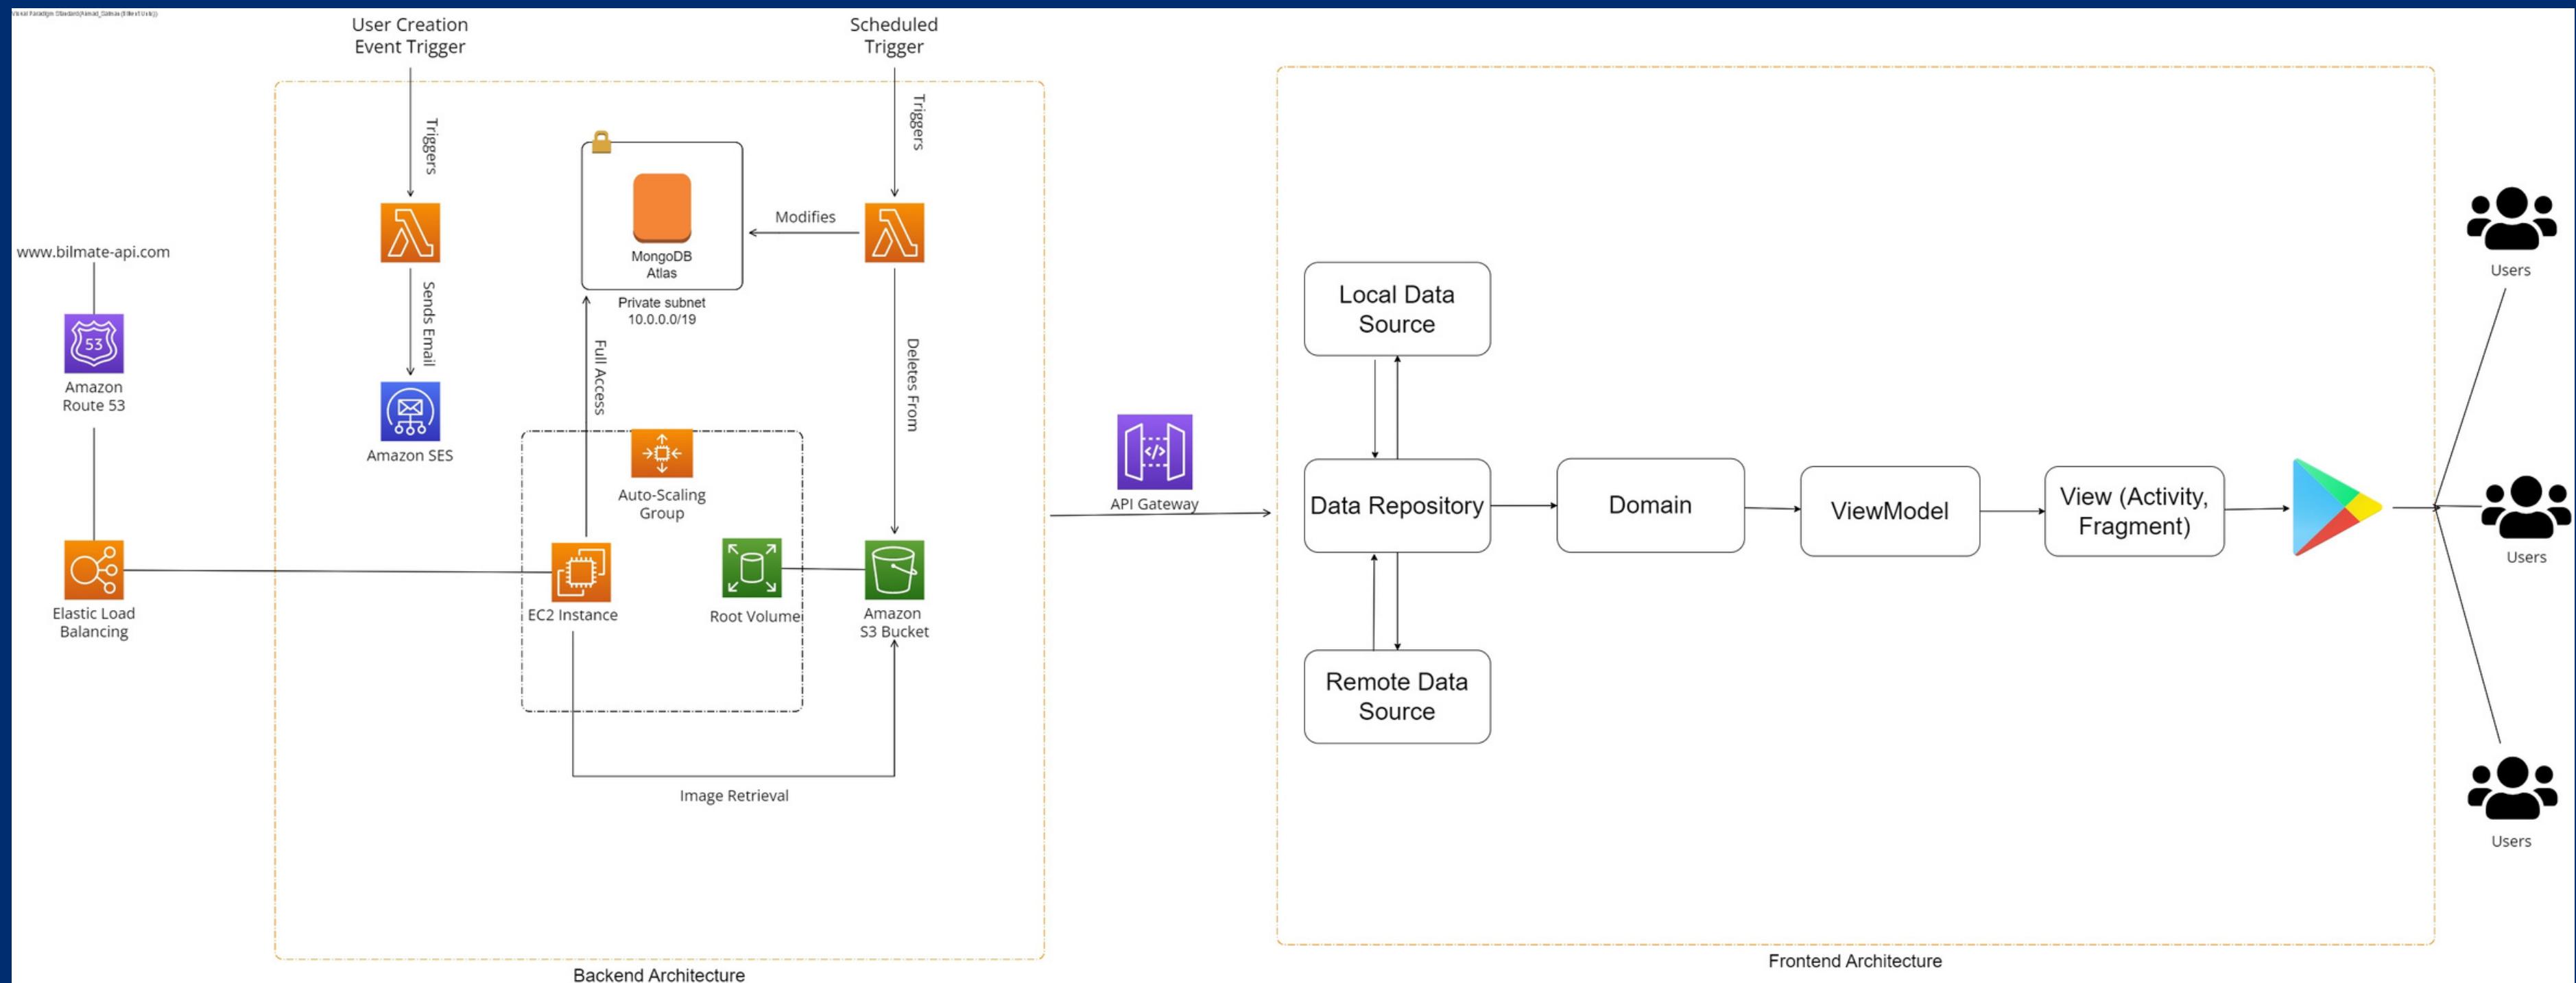

# Why BilMate

03

## Two-Way Communication

- BilMate offers the flexibility of advertising your availability in addition to seeking roommates.
- There is no need to wait for a suitable roommate to contact you. You can look for them yourself

# BilMate's Architecture

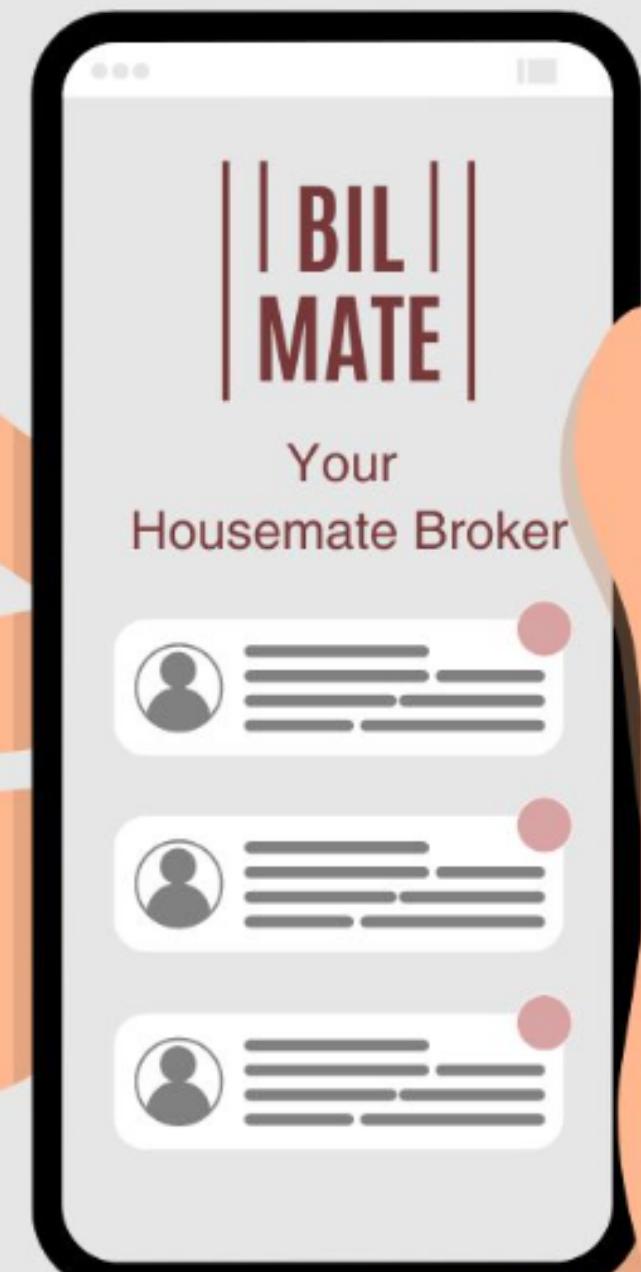

**Demo Time!!**

# Hey Mate!
